

Polyether Amine

MA-340

1. Product Description

MA-340 is characterized by repeating oxypropylene units in the backbone. It is a trifunctional primary amine having an average molecular weight of approximately 440.

2. Applications

Epoxy curing agent, Anti-sag agent for polyurethanes

3. Sales Specifications

Grade	MA-340
Color, Pt-Co	≤50
Water, %	≤0.25
Amine Value, mgKOH/g	342~370
Primary Amine, %	≥90

4. 产品物性

CAS Number	39423-51-3
Specific Gravity, 25 °C, g/cm ³	0.978
Refractive Index, n _D ²⁰	1.46
AHEW (Amine hydrogen equivalent wt.),g/eq	81

5. Packaging and Storage

Wuxi Acryl Chemical Co., Ltd.

200kg Drums.

Stored in cool and dry places.
